## Welcome to Waukesha County Technical College!

Two-thirds of the fastest-growing careers will require a technical education. And Waukesha County Technical College is focused on preparing learners for in-demand jobs within the regional and global economy.

The College's five schools – Applied Technologies, Business, Health and Protective & Human Services, Academic Foundations/General Studies—offer more than 90 technical diploma and associate degree programs, along with 75-plus short-term certificates. All deliver comprehensive training that arms students with skills that can immediately be applied to the workforce.

A WCTC education features applied learning, cutting-edge technology, individualized attention, instructors with real-world experience, employer connections and transfer options. More than 50 program-to-program transfer agreements exist with many colleges and universities, and these agreements enable WCTC associate degree graduates to transfer specific credits into baccalaureate programs, often at junior-level standing.

Multiple learning opportunities, beyond the traditional college experience, meet students' diverse needs:

- **Flexible Learning Options**, for those seeking flexible learning options, WCTC offers courses designed to fit with work and family schedules. Classes are available in alternative delivery formats that include fully online and hybrid (online and on campus).
- **Dual Enrollment Academy**, for high school students who want a jump start on their post-secondary education.
- **Career Pathways**, for students interested in acquiring new skills and earning credentials in stages, ensuring they are job-ready after each step in the path.
- **Apprenticeships**, for those seeking to learn a specific trade and earn while they learn.
