

MECHATRONICS FOR ELECTRONIC TECHNICIANS

Mechatronics for Electronic Technicians Technical Certificate

Program Code: 40-606CA

The Mechatronics for Electronic Technicians certificate is targeted to electronic technicians who want basic CAD, understanding of statics, basic mechanisms and strength of materials. Those seeking this certificate are expected to have earned – or be working toward – an associate's degree in Electronics.

Required Courses

Code	Title	Credits
Core Courses		
420-160	Manufacturing Processes - Cold	2
606-115	Technical Drafting/CAD	4
606-117	Computer Programming Engineers	3
606-118	Basic Mechanisms	3
606-162	Manufacturing Process - Hot	2
Approved Substitute: 422-162		
606-186	3D/Parametric Design	3
Total Credits		17
